ABSTRACT OF THE DISCLOSURE

An ink for use in ink jet recording which contains a dye and a pigment as colorants. The pigment is a self-dispersible pigment in which at

5 least one anionic group is bonded directly or through another atomic group to a surface of the pigment, the dye is an anionic dye, 2-pyrrolidone is further contained in the ink as a solvent, and the mass-based content X of 2-pyrrolidone in the ink and the ratio Y

10 of the pigment to the sum of the dye and the pigment satisfy the following formulas 1 to 3 at the same time:

formula 1 $12 \le X < 30$

formula 2 $50 \le Y \le 75$

15 formula 3 $Y \ge -2X + 84$.
